---

Steve,

Here are the reports for the two apps. The data was pulled yesterday but the technician manually checked every item against the data from Feb 3<sup>rd</sup>. This was the fastest way to get this completed. He said there were no differences, therefore no one deleted the apps from their device.

The installed date is the date that MAAS360 was installed on the device. We have no way to report on the installed date for apps outside of the EPA App catalogue.  
Devices check in to the MAAS360 MDM every 3 days.

Please let me know if you have any other questions or need anything.

Thanks!

Greg
